| SSLC; Percentage:68%                                           | <b>2018 - 2019</b>  |

SKILLS SUMMARY

- **Languages:** Java, JavaScript
- **Frontend:** React.js, HTML, CSS
- **Frameworks:** Spring Boot
- **Database:** MySQL
- **Tools & IDEs:** Visual Studio Code, IntelliJ IDEA

PROJECTS

- Myco-Tech- IoT powered mushroom cultivation ecosystem**

**Technologies:** Spring Boot · Arduino · MySQL

  - Developed a smart cultivation system to optimize mushroom growth by monitoring and controlling environmental factors like temperature, humidity, and CO<sub>2</sub>.
  - Built RESTful APIs using Spring Boot for real-time data processing and system control.
  - Connected Arduino-based IoT sensors with the backend for continuous data logging.
  - Designed and managed a MySQL database for sensor data storage and analysis.
  - Created a user-friendly interface for real-time monitoring and environmental control.
- Movie Booking Website**

**Technologies:** Spring Boot · React.js · MySQL

  - Developed a full-stack web application that displays a list of movies and allows users to book tickets.
  - Built RESTful APIs using Spring Boot for handling movie data, user bookings, and schedules.
  - Created a responsive user interface using React.js for smooth browsing and seat selection.
  - Used MySQL to manage users, movies, showtimes, and bookings in a structured database.
- CRM Portal**

**Technologies:** Spring Boot · React.js · MySQL

  - Developed a full-stack Customer Relationship Management (CRM) portal to manage customer information, interactions, and business operations efficiently.
  - Built RESTful APIs using Spring Boot for customer management, lead tracking, user authentication, and data processing.
  - Designed and developed a responsive user interface using React.js for managing customers, leads, and business records.
  - Integrated MySQL database to store customer details, leads, user accounts, and activity records in a structured manner.
  - Enhanced data management and user experience by providing efficient search, filtering, and record-tracking features.
- Student Database Management System**

**Technologies:** Spring Boot · MySQL · HTML · CSS

  - Developed a web application to manage student records, including adding, updating, viewing, and deleting student details.
  - Built backend REST APIs using Spring Boot for handling student data operations.
  - Designed the frontend using HTML and CSS for data input and display. Integrated MySQL database to store and manage student information securely.
  - Implemented CRUD functionalities with form validation and clean UI design.

CERTIFICATES

- Completed Full Stack Web Development certification from TAP Academy, covering Java, Spring Boot, HTML, CSS, JavaScript, and MySQL (Dec 2025).
- Completed the 12-week online course titled Introduction to Internet of Things in NPTEL with a consolidated score of 70% during January-April 2023.
- Completed the Business English Certificate (BEC) Preliminary course and acquired Level A2 with a consolidated score of 126 which is produced by Cambridge English.
- Participated in Internship Training on the topic of Full Stack Development from "Nxtlogic Software Solution".
- Certified as Java(basic) in HackerRank.
